

SENSORY SHAPES

Item # 42207

Sensory Shapes are great for tactile activity. They are also perfect for practicing sorting, color and shape recognition as well as visual spatial activities.

Sorting & Color Recognition:

- Place small hoops or buckets on the floor. Ask students to sort Sensory Shapes by placing them into the hoops or buckets by shape or by color.
- Place felt cutouts matching the shapes of the Sensory Shapes on the floor. Ask students to place shapes on the matching cutouts.
- Place a single bucket on the floor in front of the student. Verbally instruct the student to pick up each item by shape or by color, and place them into the bucket.

Visual Spatial:

- Toss shapes into hoop or bucket on the floor.
- Create a shape box. Ask student to place Sensory Shapes into the holes matching the shape.

Beth Gardiner brings an impressive array of experience and professional affiliations in the gymnastics world, spanning three decades. As owner of Heart of Texas Gymnastics Beth specializes in preschool gymnastics, recreational, compulsory team and special needs gymnastics. Her child-first philosophy and skill-based curriculum have proven effective in building dynamic and highly successful gymnastics programs. Through these, and as a volunteer with Special Olympics and other private organizations, she regularly works with children and adults who have disabilities, researching ways to serve the special needs population in the gym environment. Beth has also served as a USA Gymnastics National Instructor since 1997 and is a 1983 graduate of Texas A&M University.
